

# Your HTC Aria™

## Quick start guide

**htc**  
*quietly brilliant*

## Before you do anything else, please read this

### Charge the battery

The battery in your phone hasn't been charged yet. While your phone is charging, it's important that you do not remove the battery pack. Doing so can damage your phone. Also, please don't try to take your phone apart. (If you do, it may invalidate your warranty.)

### Choose a rate plan wisely

Your phone can use up a lot of Internet bandwidth really quickly. Before you use your phone, we strongly recommend that you talk to your mobile operator about data rates. If you're on a standard data plan, the costs could really add up. Switching to a flat-rate plan could be a lot cheaper.

### Know about privacy laws

Some countries have strict laws about how and when you can record phone conversations. For example, you may need to tell the person you're speaking to before you start recording. It's a good idea to find out what the laws are where you live before you use your phone's recording feature.

### And finally, a few important words from our legal team (LIMITATION OF DAMAGES)

To the maximum extent permitted by applicable law, in no event shall HTC or its affiliates be liable to you, any user, or third party for any indirect, special, consequential, incidental or punitive damages of any kind, arising in contract, tort, or otherwise, including, but not limited to, injury, loss of revenue, loss of goodwill, loss of business opportunity, loss of data, and/or loss of profits, regardless of the foreseeability thereof or whether HTC or its affiliates have been advised of the possibility of such damages. And in no event shall the total liability of HTC or its affiliates exceed the amount received from you, regardless of the legal theory under which the cause of action is brought. The foregoing does not affect any statutory rights which may not be disclaimed.

This quick start guide will help you get started with your phone. In this guide, we use the following symbols to indicate important or useful information:

## 1. What's in the box

---

Here's what you should find inside the box:

- Phone
- Battery
- USB cable
- 3.5 mm stereo headset
- microSD™ card
- Power adapter
- This quick start guide

## 2. Get to know your phone

---

### 3. Before you turn on your phone

---

#### Take the back cover off

1. Hold the device securely with one hand and the back panel facing you.
2. Gently push the speaker with your thumb until the back cover disengages from the device.

3. Carefully pull the back cover to remove it.

#### Insert the SIM card

1. Insert the SIM card with its gold contacts facing down and its cut-off corner facing out from the slot.
2. Slide the SIM card completely into the slot.

### Insert the battery

1. Insert the battery with its exposed copper contacts into the phone first. The exposed copper contacts should be on the right when you insert the battery.
2. Push the battery all the way in.

### Insert the microSD card

1. Insert the microSD card into the slot with its gold contacts facing down.
2. Push it all the way in until you hear a click.

### Put the back cover on

1. Insert the tabs inside the back cover into the holes at the bottom panel of the phone.
2. Press the phone against the back cover until it clicks into place.

You must install the back cover for the antenna to function properly.

### Charge the battery

1. Insert the power adapter plug into the USB connector at the bottom of your phone.
2. Connect the power adapter to an electrical outlet to start charging the battery. It will take about three hours for the battery to be fully charged.

If the AC adapter that comes with your phone has interchangeable plugs, you must first attach the plug to the AC adapter before charging the battery.

After installing the SIM card, battery, and microSD card and charging the battery, you are now ready to turn your phone on for the first time. Press the POWER button to turn on your phone.

Read on and start exploring what you can do with your phone.

## 4. Get started

---

When you turn on your phone for the first time, your phone displays tutorials and guides you to set up your email accounts and favorite social networks. You can follow the onscreen instructions to complete the setup, or skip the setup and do it at another time.

1. Choose the phone language you want to use, and then tap **Next**.
2. Your phone walks you through a tutorial on how to use the onscreen keyboard. Follow through the tutorial to learn how to use the onscreen keyboard. Tap **Skip** to not go through the tutorial.
3. On the Internet connection screen, select how you want to connect to the Internet, and then tap **Next**.
4. If there are Wi-Fi networks in range, you will be asked if you want to connect to a Wi-Fi network. Tap **Next** and then tap the wireless network that you want to connect to, or clear the **Connect to Wi-Fi network** checkbox, and then tap **Next** to set up your Wi-Fi connection at a later time.
5. On the Location consent screen, you can choose whether to allow Google's location service to collect information about your location. Clear or select the checkbox, and then tap **Next**.

Some phone features such as Weather and Footprints require Google's location service to automatically determine your current location.

This service may incur additional data transfer fees from your provider. You can enable or disable this service later in your phone's location settings.

6. On the Set up accounts screen, choose the type of account you want to set up and follow the onscreen instructions to complete the setup. Tap **Skip** to set up accounts at a later time.

When you are done setting up your accounts, tap **Next**.

7. On the Set up social networks screen, choose the type of social network account, such as Facebook® and Twitter™, that you want to access from your phone. Follow the onscreen instructions to log in to your social network account. Tap **Skip** to set up social network accounts at a later time.

When you are done setting up your accounts, tap **Next** on the Set up social networks screen.

8. The final screen shows you where you can learn more about using your phone. Tap **Finish**.

## 5. Add your contacts

---

There are several ways you can add contacts to your phone.

### Importing all contacts from your SIM card

1. From the Home screen, tap  > **People**.
2. On the **All** tab, press MENU. Then tap **Import/Export** > **Import from SIM card**.

If you're using a Google and/or Exchange ActiveSync account on your phone, you'll need to tap the type of contact to categorize the imported contacts.

3. On the Select contacts to import screen, press MENU, and then tap **Import all**.

## Adding a new contact

1. From the Home screen, tap  > **People**.
2. On the **All** tab, tap **Add contact**.
3. Tap the **Name** field, enter the first and last name of the contact, and then tap **OK**.
4. Tap  to hide the onscreen keyboard, tap the **Display name** box, and then choose how you want the contact name to be displayed in your contacts list.
5. Tap **OK**.
6. Choose the **Contact account** under which to create your contact.
7. Enter the rest of the contact information into the relevant fields.
8. Scroll to the bottom of the screen, and then tap **Save**.

## Synchronizing contacts from other sources

You can quickly and seamlessly sync your phone with your contacts in your Google Account, Microsoft Office Outlook, Outlook Express, Exchange ActiveSync account, and even Facebook. Take a look at the complete user guide on our website, [www.htc.com/support](http://www.htc.com/support), to see how it's done.

## 6. Make your first call

---

1. From the Home screen, tap **Phone**.
2. Dial the number or contact you want to call, and then tap **Call**.

As you tap the keys on the phone dialer, the screen will display matches found on your phone and call log based on the keys you have tapped.

3. To hang up, tap **End call**.

## 7. HTC Sense

Discover HTC Sense™ on your phone, an intuitive, seamless experience built upon three fundamental principles — make it mine, stay close, and discover the unexpected.

### Personalized Home screen

The Home screen is highly customizable and extends beyond the screen width, giving you lots of room to add the information that matters most to you and tools or applications that make your life easier. There are up to seven screens that extend to the left and right sides of your phone display.

Slide your finger left or right to go to the other parts of the extended Home screen.

OR

Pinch the screen to show a snapshot of the Home screen and extended Home screen, and then tap a screen thumbnail to directly go that screen.

You can press the HOME button anytime, whatever you're doing on your phone, and go straight to the Home screen.

### Widgets

Widgets put at-a-glance important information and media content up front on your Home screen. A wide selection of widgets is available on your phone, or if that's not enough, you can download more widgets from the Web to add to the Home screen.

To add widgets to the Home screen, tap , and then select **Widget**.

## Scenes

Can't decide how to set up your Home screen? Check out **Scenes** that we've included in the phone. Scenes are preset Home screen layouts that you can quickly apply. From the Home screen, press MENU, and then tap **Scenes** to check out the presets.

After selecting a preset, you can customize it and save it as a new scene.

1. Customize the Home screen by changing the wallpaper. You can also add widgets, shortcuts, and more.
2. After you're done customizing, press MENU, and then tap **Scenes**.
3. Select **Current (unsaved)**, and then tap **Save**.
4. Enter the **Scene name**, and then tap **Done**.

You can rename or delete a custom scene. From the Home screen, press MENU and tap **Settings > Personalize > Scenes**. Under **My scenes**, press and hold a scene and then select what you want to do.

## People

Bring the people who matter the most closer. Your phone organizes all text exchanges, email conversations, Facebook status, online photo albums and phone logs of a contact all in one place.

Tap the name of a contact and you can see all your recent communications with that person at a glance.

## Friend Stream

Streamline your social network accounts through Friend Stream. With Friend Stream, you can post what's on your mind simultaneously across your social network, view status updates and tweets, and look through photos from your social network accounts.

## News

Subscribe to news feeds to keep up with the latest buzz on the Internet. News monitors RSS feeds from your favorite news sites, blogs and more, and downloads the most current updates.

## Microsoft Exchange ActiveSync

Now you can use a cool phone while keeping your work email and other information safe. Your phone has enhanced support for Exchange security features such as password protection and Remote Wipe.

You can also set your Out of Office status right from your phone. And you can easily access your company's Global Address Book to contact someone whose details aren't on your phone.

## 8. Connect to the Internet

---

Your phone puts the whole Internet in your pocket. You can get online using a data connection or Wi-Fi.

### Using a data connection

It's simple. When you turn your phone on for the first time (with the SIM card inserted), it should connect automatically to your mobile operator's data service.

If you don't get a connection automatically, there are two things to try.

- **Check that the data connection is turned on.**  
It may just be that your data connection isn't turned on. To check whether it is on:
  1. From the Home screen, press MENU, and then tap **Settings**.
  2. Tap **Wireless & networks**, and select the **Mobile network** check box to turn your connection on.
- **Check if you've selected the correct mobile network.**
  1. From the Home screen, press MENU, and then tap **Settings**.
  2. Tap **Wireless & networks > Mobile network settings > Network operators** or **Access Point Names**.

### Using Wi-Fi

1. From the Home screen, press MENU, and then tap **Settings > Wireless & networks**.
2. Select the **Wi-Fi** check box to turn Wi-Fi on and scan for available wireless networks.
3. Tap **Wi-Fi settings**. You'll see the network names and security settings of any detected Wi-Fi networks.

4. Tap a Wi-Fi network to connect to. If you select an open network, you'll be automatically connected. If you select a secured network, enter the key, and then tap **Connect**.

## Browsing the Web

Your phone's browser makes web browsing easy and fun.

1. From the Home screen, tap  > **Internet**.
2. On the Browser screen, press MENU, and then tap the URL field on top of the screen.
3. Enter the web address. As you enter the address, matching web addresses will appear on the screen. Tap an address to go directly to that webpage, or continue entering the web address of your choice, and then tap the Enter key .
4. On the webpage, use finger gestures to browse the webpage or to zoom in or out.

Spread your thumb and index finger across a webpage to zoom in.

Pinch your thumb and index finger on a webpage to zoom out.

## 9. Get your messages across

---

Access your email accounts right from your phone.

### Adding a POP3/IMAP email account

1. From the Home screen, tap  > **Mail**.
2. On the Choose a mail provider screen, tap **Other (POP3/IMAP)**.

If the account type you want to set up isn't already in your phone's database, you'll be asked to enter a few more details. Have your email server information ready to save time. Your email provider can help you with this information.

3. Enter the **Email address** and **Password** for the email account, and then tap **Next**.
4. Enter the **Account name** and **Your name**, and then tap **Finish setup**.

You can also set up an Exchange ActiveSync account. See the Email chapter of the user guide on our website to see how.

### Sending an email message

1. From the Home screen, tap  > **Mail**.
2. On the email account Inbox, press MENU and then tap **Compose**.
3. Fill in one or more recipients. You can:
  - Enter email addresses directly in the **To** field. If you're sending the email to several recipients, separate the email addresses with a comma.
  - Tap the  icon, and then select the contacts to whom you want to send the message. When you have selected all the message recipients, tap **OK**.
4. Enter the subject, and then enter your message.
5. Tap **Send**.

## 10. Stay in touch with friends

Your phone has everything you need to connect with your friends online. **People** and **Friend Stream** give you direct access to all the leading social networks. You can update your status on Facebook, look at photos in your online albums, and follow your tweets on Twitter. It's all built in and easy to use.

See the Social chapter of the user guide on our website to learn more about Friend Stream, Facebook, and Peep (the Twitter client on your phone).

## 11. Get files into your phone

---

Bring your files with you wherever you go. You can view Word, Excel, PowerPoint, and PDF files on your phone. You can also listen to music and look at your prized gallery of photos and videos.

You'll need to plug in your microSD card before you can copy files into your phone.

1. Connect the phone to your computer using the supplied USB cable.
2. When the **Connect to PC** dialog box appears, select **Disk drive**, and then tap **Done**.
3. On your computer, the connected phone is recognized as a removable disk. Go to this removable disk and open it.
4. Copy the files to the storage card.
5. After copying the files, unmount your phone as required by your computer's operating system to safely remove your phone.
6. Do any of the following:
  - Disconnect the phone from the computer.
  - If you want to keep the phone connected to the computer but want the phone to be able to access the storage card, open the Notifications panel, tap **Disk drive**, select an option except **Disk drive**, and then tap **Done**.

## 12. Sync your phone with your computer

---

You can use HTC Sync to sync Outlook contacts and calendar or Outlook Express contacts between your computer and your phone.

### Installing HTC Sync that came with the microSD card

Use the HTC Sync installer that's in the supplied microSD card to install.

1. Make sure the microSD card is inserted on your phone.
2. Connect your phone to your computer using the USB cable that came with your phone.
3. You'll see the Connect to PC screen on your phone. Tap **Disk drive** and then tap **Done**.
4. Your computer will treat your phone as a removable disk (just like any USB drive). Open this removable disk so you can see what's inside the microSD card.
5. Copy HTCSync.exe to your computer.
6. After copying, unmount the removable disk (that is, the connected phone) as required by your computer's operating system to safely remove your phone.
7. On your computer, double-click HTCSync.exe and follow the onscreen instructions to install HTC Sync.

### Setting up HTC Sync

After installing, set up HTC Sync to recognize and sync with your phone.

1. Connect your phone to your computer.
2. On the Connect to PC screen in your phone, tap **HTC Sync** and then tap **Done**. Your phone then attempts to find HTC Sync on your computer which may take a few seconds.

If your phone displays a message indicating that it's unable to find HTC Sync, try disconnecting and reconnecting the USB cable, and then repeat step 2.

3. When your phone finds HTC Sync, your computer will display the Phone Connection Wizard. Click **Next**.
4. Enter a name for your phone, and then click **Finish**.
5. Check the HTC Sync icon on the computer. If it's green in color, that means your phone is connected with your computer and HTC Sync recognizes the phone.

6. Double-click the green HTC Sync icon. Then click **Synchronize Now** (or **Sync Manager > Settings**).
7. In the Synchronization Settings Wizard, click **Next**.
8. In the next few dialog boxes, choose whether to sync Outlook or Outlook Express, select the type of information to sync (contacts and/or calendar), and choose to sync them automatically with your phone.
9. Click **Finish**.

## Synchronizing your phone and computer automatically

Do the following first to make sure your phone will sync automatically with your computer:

1. From the Home screen, press HOME > MENU, and then tap **Settings > Applications > Development**.
2. Make sure the **USB debugging** check box is selected.

Whenever you connect your phone to your computer, synchronization starts automatically.

## Downloading the latest HTC Sync upgrade

Visit the HTC support website ([www.htc.com/support](http://www.htc.com/support)) from time to time to check for the most recent HTC Sync upgrade so you can download and install it on your computer. After installing the latest upgrade, follow the steps again in "Setting up HTC Sync" to set up HTC Sync to recognize and sync with your phone.

## 13. Make your phone truly yours

---

Change the way your phone looks and sounds. You can personalize your phone using your own photos as Home screen wallpaper or your favorite music as your ring tone. You can also use pre-installed wallpapers or ring tones.

### Changing the Home screen wallpaper

1. From the Home screen, press MENU, and then tap **Wallpaper > Home**.
2. Tap **HTC wallpapers** or **Photos**.
3. Tap the wallpaper you want to use, and then tap **Save** (if you selected **Photos**), or **Set wallpaper** (if you selected **HTC wallpapers**).

### Changing the ring tone

1. From the Home screen, press MENU, and then tap **Settings**.
2. Tap **Sound & display > Phone ringtone**.
3. Select the ringtone you want to use, and tap **OK**.

## 14.Factory resetting

---

Need to start over? If you're passing your phone on to someone else or just want a fresh start, you can factory reset your phone. It's not a step to be taken lightly. Factory resetting your phone will delete all your data, including any applications you've downloaded and installed. It returns the phone to the state it was in before the first time you turned it on.

Be sure to back up any data that you want to keep before you factory reset your phone.

### Resetting the phone through settings

1. From the Home screen, press MENU, and then tap **Settings > Privacy > Factory data reset**.
2. On the Factory data reset screen, tap **Reset phone**, and then tap **Erase everything**.

### Resetting the phone using phone buttons

1. With the phone turned off, press and hold the VOLUME DOWN button, and then briefly press the POWER button.
2. When you see the androids on the screen, release the VOLUME DOWN button.
3. Press VOLUME DOWN to select **CLEAR STORAGE**, and then press POWER.
4. When asked to confirm, press VOLUME UP.

Factory resetting your phone does not delete the contents in your microSD card.

## 15. Troubleshooting tips

---

If you ever have any problems using your phone, here are some things you can do to set things right again.

- Check whether there is enough free space on the phone to run the application.

To check free space, go to the Home screen, press MENU, and then tap **Settings > SD & phone storage**.

- Clear your data and cache of applications.

To clear the data and cache, go to the Home screen, press MENU, and then tap **Settings > Applications > Manage applications**.

- Uninstall any third-party applications.

To uninstall third-party applications, go to the Home screen, press MENU, and then tap **Settings > Applications > Manage applications**.

- If your phone becomes unresponsive, remove the battery, wait for three seconds, then reinsert the battery and turn the phone on. Or back up your important data and factory reset the phone.

To factory reset, go to the Home screen, press HOME > MENU, and then tap **Settings > Privacy > Factory data reset**.

- Check for additional updates and useful tips on our website: [www.htc.com/support](http://www.htc.com/support).
